

PTA 220 : FUNCTIONAL ANATOMY & KINESIOLOGY

This course provides an in-depth, clinically oriented study of functional anatomy. Emphasis is placed on the musculoskeletal system, nervous system, and study of human movement. Upon completion of the course, the student should be able to identify specific anatomical structures and analyze human movements. This is a 3-hour class that will use Canvas. A variety of instructional methods including palpation, Power Point presentations, lecture handouts, and kinesthetic learning will be used to facilitate students' achievement of the objectives.

Credits 3

Prerequisites

Admission to PTA Program

Corequisites

PTA 202, PTA 222, PTA 250, PTA 240
